Guangzhou (Australia), 10-13 September, 2019

The Local Organising Committee, the National Committee for Coastal and Ocean Engineering, Engineers Australia, PIANC Australia and Engineering New Zealand invite to attend Australasian Coasts and Ports 2019.

The Conference Theme “Future directions from 40°S and beyond” reflects the increasing awareness about the need to find suitable means for adapting to change in the “right” direction. It also identifies a geographical location (in latitude) at the northern extremity of Tasmania. Beyond 40°S is the world at large.

Australasian Coasts and Ports 2019 will bring professionals (engineers, planners, scientists and researchers) to meet and discuss multi-disciplinary issues related to coasts and ports, to focus on the technological, scientific, policy, planning and design issues.

Diversity and Inclusion are important to future. Engagement of people from a range of cultures, backgrounds and experiences will enhance the industry’s ability to deliver innovative solutions to society within a culture of collaborative respect.

Australasian Coasts & Ports 2019 incorporate numerous concurrent streams for technical presentations, half-day field trips and the opportunity to network with colleagues offering a vibrant social program and other optional activities.
