The International Ports, Maritime and Coastal Infrastructure Conference is the premier interdisciplinary forum for the presentation of new advances and research results in the fields of Marine and Environmental Sciences.
Today more than ever before it is extremely important to stay abreast of the changing landscapes of the Marine and Environmental Sciences world.

The multidisciplinary focus of this event aims to bring together leading academic scientists, researchers and research scholars to exchange and share their experiences and research results on all aspects, but also presenters and attendees from different fields with expertise in various areas of Marine and Environmental Sciences, providing an excellent opportunity to participate in the international exchange of ideas, current strategies, concepts and best practices, collaborations, and cooperation, offering a broader perspective and more enriching experience.

It also provides a digital interdisciplinary platform for researchers, practitioners and educators to present and discuss the most recent innovations, trends, and concerns as well as practical challenges encountered and solutions adopted in the fields of Ports, Maritime and Coastal Infrastructure.
