One of the most complex discussions concerning climate emergency is the sustainable water management. How to deal with the risks generated by climate change where the presence of cultural and environmental assets is highly stratified over time? How to manage large densely populated areas rich in environmental and human resources, ensuring their protection and development? It’s now time to integrate the connections between the different territorial scales and to ensure the balance between public and private interests in a framework of sustainable strategies. SOS Climate Waterfront is an interdisciplinary project that aims to explore waterfronts in Europe that are facing climate change. The volume presents the results of the workshop held in Rome in spring 2022.

Table of contents

Camilla Di Marcantonio, Agostina Chiavola, Maria Rosaria Boni

The Problem of Forgotten Peripheral Rivers and Streams in Big Cities
Paulina Bone

Projects results
Discovering Aniene
Permeable Widen Aniene

PART 4: Water as a Lifeline for Rome

Urban Watering by Nature: the Romans way. A graphic story
Germaine Sanders

Author's Biography

Pedro RESSANO GARCIA

Pedro Ressano Garcia is an architect who divides his time between research, teaching and the practice of architecture. Currently he's teaching at École d'architecture de l'Université Laval at Québec. He began teaching at the University of California, Berkeley in 1996 and he was a professor in Portugal. Is has lived and worked in various waterfront cities, Barcelona, Lisbon, Quebec, Oporto, Rio de Janeiro, San Francisco. He has collaborated as an expert in Abu Dhabi, Beograd, Cairo, Eindhoven, Cracow, Hamburg, Trieste, Taiwan, Gdansk, Guangzhou and Sidney; his research mainly focuses on the transformation of riverside towns. In his studio in Lisbon (Pedro Ressano Garcia Studios), theory and practice are combined in architecture and urban design projects, as well as in the development of studies and ideas that enhance each cultural reality.

Claudia MATTOGNO

Claudia Mattogno, PhD architect and urban planner, is full professor of Urban Planning at the Sapienza University of Rome. Her research fields concern urban design with reference to the structure and meaning of relational spaces, the transformations of public housing districts and the contemporary landscape, urban agriculture and gender studies.

Bruno MONARDO

Bruno Monardo, Architect, PhD in Urban and Regional Planning, is Associate Professor of Urban and Regional Planning at the Department of Planning, Design, Technology of Architecture (PDTA), Sapienza University of Rome (Italy). Visiting professor and invited scholar at international institutions as Massachusetts Institute

of Technology in Cambridge (Massachusetts, USA), Northeastern University in Boston (Massachusetts, USA), San Diego State University (California, USA), Institut d'Aménagement et d'Urbanisme Ile-de-France (AIU) in Paris. He has directed and still coordinates international research projects on various topics, such as the relationship between mobility planning and urban regeneration, the impact of Innovation Districts on local and regional development, the phenomenon of "Urban Centers" as turbines of participatory democracy; on these issues he has edited numerous volumes, essays, articles.

Antonio CAPPUCCITTI

Antonio Cappuccitti, civil engineer and Ph.D., is an associate professor at the Sapienza University of Rome, Faculty of Civil and Industrial Engineering. His favorite research fields: urban morphology, rules and regulations for a good city form, innovative plans and programs for urban regeneration.
